

Biofuels: food versus fuel?

Whether you drive a car or take a bus you will be using biofuels made from food crops, palm oil, soya or sugar.

Vast areas of land worldwide are being turned into biofuel plantations. But...

What about food prices?

Are biofuels really a solution to climate change?

Can we make biofuels 'sustainable' on a large scale?

What do farmers in the South think about growing crops for our cars?

Almuth Ernsting co-director of Biofuelwatch (www.biofuelwatch.org.uk) will discuss what biofuels mean for climate change, food and for people. Almuth presented at a Side-Event of the United Nations Framework Convention on Climate Change COP-13, Bali, December 2007.

**Wednesday, 26th November, 7pm
City Arts Centre, King Street**

With illustrations from Paraguay, Ghana and Indonesia. Followed by questions and discussion.

Organised by Aberdeen Campaign Against Climate Change.
